

I hear much about the congressional talks you are having in regards to the WI no-call list. Unfortunately they do NOT include the general public of WI. Not once have i heard anyone from your office ask the citizens of WI what they want. The great thing about being a Democracy is the ability for the majority to create and sustain laws. The one law (WI no call list) is supported by more than 80% of WI residence. This should be a clear sign that we as a group and a state have needs that cannot be met at the federal level in regards to privacy at home. This privacy includes the RIGHT for us to create laws which protect us from UNWANTED calls. I get calls past 9PM. Just yesterday I had 5 in a row. I PAY for my phone service (along with all these stupid surcharges, taxes, etc) and have the right for strict laws which prohibits companies from bothering me at home. Let these companies send MAIL, but i don't need a call. There are many NONE-INTRUSIVE ways to be contacted and MAIL would help spur money into the USPS while at the same time stop unwanted solicitations at home.

This is the RIGHT thing to do because as a populas, we have the right in this country to vote as a majority and be heard. And that is what we are doing!

Thank you for your time!
